Coast of Crimea

About four miles west of Cape AITODOR at approximately 800 meters away: three buildings with towers having metal cupolas. It was not ascertained whether or not there were any weapons.

On BYERMEN HILL, (lat. 45.02.8 North - long. 35.38 East): on the crest of the hill rose a very high antenna.

The topography of the eastern side of the KERCH channel was considerably modified in comparison with that reported on the nautical chart.

The coast in question, as indicated on the enclosed sketch in which the traced line indicates a large quay with several railroad tracks running alongside, several sheds lined up parallel to the quay, various other smaller buildings, and a number of signal lights.

25X1

Naval sightings

[redacted] a  
seagoing submarine appeared (displacement about 800 tons - length about 75 meters) at about 1000 meters [redacted]

25X1

25X1

After a few minutes, two more submarines of the same type appeared, coming from Cape KHERSONESE and after having overtaken the former, together they headed southeast.

25X1

[redacted]  
[redacted] no weapons of any kind were on deck [redacted]  
[redacted]

[redacted] three miles south of Cape Chauda was sighted a naval formation at anchor (with boat booms out and boats in the water) composed of: one cruiser of the SVERDLOV class; three destroyers of the SKORYY class; three destroyers of the KOLA class.

[redacted] three miles south of Cape CHAUDA a second cruiser was sighted - presumably also of the SVERDLOV class -

SINZEWA Harbor (ZHDANOV)

Refer to enclosure (2).

(1) Coal mole: two mooring posts; four bucket cranes.

(2) Coal quay:

(a) In the embankment construction area two barges were noted;

(b) Machinery: 8 bucket cranes.

(3) Iron ore mole: four cranes along the southern edge (c) and four along the northern edge (d).

(4) Floating dock: a Russian tanker of about 3500 tons in dock.

(5) New mole or pier which serves all the industrial installations which are located immediately at the head of the pier.

(6) Three industrial establishments, the most important of which is a steel mill. (Six blast furnaces were noticed.)
